SOUTHERN REGION FARM MACHINERY TRAINING & TESTING INSTITUTE, ANANTAPUR, (A.P.)

17. COMMENTS & RECOMMENDATIONS

17.1 Engine Performance:

- 17.1.1 The maximum power and rated power were observed as 3.9 kW respectively under natural ambient condition against the declared value of 4.0 kW.
- 17.1.2 Specific fuel consumption of engine corresponding to maximum power was recorded as 401 g/kWh against the declared value of 280 g/kWh. This should be looked into for corrective action.
- 17.1.3 Max. Torque was observed as 12.89 Nm against the declared value of 11.9 Nm.
- 17.1.4 Back up torque of engine was observed as 3.78 %, against the declared value of $\geq 12\%$. This should be looked into for corrective action.
- 17.1.5 During varying speed test of engine at both natural & high ambient conditions after attaining max. torque at 12.89 Nm & 12.19 Nm respectively, while further loading, sudden drop of engine speed and thick black smoke was noticed.
- 17.2 Max. Noise at operator's ear level was observed as 92 dB (A), against the max. limit of ILO of 90 dB (A). This should be looked into for corrective action.
- **17.3** The amplitude of mechanical vibration on most of the assemblies of the Power Weeder was observed up to the maximum extent of 372 microns, which is higher than the limit of ILO microns. Therefore necessary action to dampen the vibration should be taken in to account.
- **17.4** The hardness of rotary blades conforms to the requirement of IS 6690:1981 (Reaffirmed 2012).
- 17.5 Except silicon content, remaining constituents of chemical analysis of rotary blades conforms to the requirement of IS 6690:1981 (Reaffirmed 2012). This should be looked in to for corrective action
- 17.6 The provided labeling plate should be as per the requirement of IS.

17.7 Technical literature:

User's manual and parts catalogue of power weeder in separate booklets were supplied with the test sample for reference during the test. It is however, recommended that same may be revised and brought out in Hindi & other regional languages as per IS 8132:1999 (Reaffirmed 2004) for the sake of user & technical personnel.

TESTING AUTHORITY:

B.N. DIXIT AGRICULTURAL ENGINEER

Dr. P.P. RAO DIRECTOR

18. APPLICANT'S COMMENTS

Para	Our	Applicant's comments	
No.	reference		
18.1	17.1.2	We will take necessary action to improve & correct the SFC at	
		max. power of engine with engine supplier for production	
	(g)	batches.	
18.2	17.1.4	We will take necessary action to improve & correct the backup	
anonar		torque with engine supplier for production batches.	
18.3	17.1.5	We will take necessary action to improve & correct the engine	
		speed & thick black smoke at both natural & high ambient	
	and the set of the	conditions after attaining max, torque with engine supplier for	
		production batches	
10.4	17.0	We ill the max pairs of a reduce the max pairs of	
18.4	17.2	we will take necessary action to reduce the max. Horse at	
		operator's ear level.	
18.5	17.3	We will take necessary action to reduce the vibration of various	
	5	components in power weeder.	
18.6	17.5	We will take necessary action to improve the chemical	
		composition of rotor blades in production batches.	
187	177	Operator's manual & parts catalogue of power weeder will be	
10.7	17.7	suitably modified in line with IS \$132:1000 (Reaffirmed 2004)	
		Suitably mourned in-fine with 15 8152.1555 (Realifined 2004)	
	A No	for the sake of user & technical personnel.
