02	Under Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) 2.0, The team of WDC - DWMA identified the potential for water harvesting and constructed a Farmpond at HLC canal Inlet down side area of Farm . <u>The details of the structures are as follows:</u> Farm Pond 1: Bottom area 20 × 40 sq. meters, Top (outer) area 22 × 42 sq. meters and Depth 3.0 meters, Slope 2.5%. The water storage capacity is approx. 2500 cubic meters (m ³). The excavated soil from the construction of the farm ponds has been utilized and strengthened the bunds around each pond. The soil was spread to a height of 3 feet above ground level, forming bunds with a base width of 5 meters and a top width of 3 meters around farm pond. These bunds has several multiple purposes: They provide additional storage capacity for HLC and rainwater, Facilitate the harvesting of runoff from the surrounding catchment area through inlet and outlet structures and Help prevent soil erosion, thereby enhancing the structural integrity of the ponds. These have been interconnected to ensure that every drop of harvested water is efficiently stored and utilized. This is not only maximizes water conservation but also contributes to groundwater recharge, improving the yield of surrounding bore wells and promoting sustainable irrigation practices.
03	Present Crop Status : Redgram: The crop is now reproductive and pod formation phase. presently due to DITwa cyclone have the dark cloudy climate, be a negative effect on yield. Groundnut: The crop is harvesting now. Bajra And Jowar: Due to previous cyclonic effects like Montha, presently DITwa and continuous dark cloudy climate causing damage by discolouration, etc Maize : Crop failed due to unsuitable climatic factors like rain fall, temperatures, cyclonic effects.
04	Green manure - Pillepesara Crop Details: Sowing Dates: 01.10.2025 & 10.10.2025, Seed Rate: 8 kg per acre, Total Seed Used: 200 kg, Area covered : 26 Acres, Plot / Survey Numbers: 38, 39, 40,41,42 / 72, Fungicide Used: Carbendazim for seed treatment @3 g/kg of seed Crop Status: SOIL incorporation work will be carried out as per rainfall/moisture availability. Green manure - Dhaincha Crop Details: Sowing Dates: 29.10.2025 & 30.10.2025, Seed Rate: 8 kg per acre, Total Seed Used: 80 kg, Area covered : 10 Acres, Plot / Survey Numbers: 79,80,81 & 69 / 20, Fungicide Used: Carbendazim for seed treatment @3 g/kg of seed Crop Status: Seed has been treated with fungicide to prevent seed-borne diseases. The crop was germinated. spacing of 30 x 30 cm. 16 acres more of field to be covered upon arrival of rains/ based on moisture.
05	Orchards Maintenance concurrent with seasonal field works : The inter-culture operations are currently under progress in the orchards in anticipation of the rains . These efforts aim to remove weeds, enhance soil condition through the incorporation of debris beneath the trees. Loosen the soil structure and improve irrigation water percolation capacity. Inter-culture activities are being carried out in the Mosambi, Coconut, Drumstick, Custard apple and Mango orchards.
06	Lower branches, including dry, diseased and drooping ones, were trimmed and pruned from the plantation area located from the office main gate up to the temple gate. This pruning activity helps in improving the vertical canopy structure, supports straight bark growth and enhances light and air penetration, thereby reducing the risk of disease spread. Additionally, the overall look and aesthetic appearance of the area has been significantly improved.
07	The testing section is conducting trials of machinery, including Weeders, etc in the Mosambi, Lemon and sapota orchards. Weeding has been doing under the canopy and root zone areas of young plants to conserve soil moisture.
08	Regularly collect and remove dry coconut leaves, ensuring the area remains clear of debris and hazardous materials. To facilitate seamless field operations, drip laterals were carefully folded and secured. thoroughly cleaned the Coconut, Mosambi, Mango, Custard apple, Drumstick orchards with cultivators and weeders , eliminating weeds and preventing regrowth.
09	The office garden, encompassing the hedge, lawns, avenues, ornamental plants and estate plantations, is being meticulously maintained to ensure beauty and charm. maintenance activities include: Hedge shaping, Lawn mowing, Strategic placement of pot plants to enhance the garden's greenery and aesthetic appeal and creating a welcoming and serene atmosphere.
10	The drip irrigation system undergoes thorough inspections to ensure optimal performance. Cleaning of the system to prevent clogging. Replacement of damaged micro tubes, dippers and lateral lines. For the healthy growth and development of our diverse crop portfolio, which includes Sapota, Coconut, Mango, Custard Apple, Mosambi, Drumstick and Lemon. By prioritizing the upkeep of our drip irrigation system, we can maximize water efficiency, reduce waste.
11	the areas surrounding the old barracks, park, etc at the colony premises, manicured by the shrub master, Brush cutter operations. This maintenance effort aimed to maintain a neat and aesthetically pleasing environment within the colony.

12	Providing regular water tanker services to the young new plantations.
13	Regular maintenance of PVC pipelines was carried out, focusing on the overhead tank area, residential colony areas, Coconut, Sapota, Mosambi side orchard and Lemon orchard. attended the fitting and repair of various pipeline works timely ensuring water supply.
14	Various miscellaneous tasks and assignments as instructed by the competent authority on an as-needed basis, prioritize flexibility and responsiveness to ensure timely completion of all assigned tasks.
